

TABLE - 12

Name : _____

Table 12

Flippy once jumped into a dry well

$$12 \times 1 = 12$$

He landed straight on the floor

$$12 \times 2 = 24$$

He was indeed in a big fix

$$12 \times 3 = 36$$

He knew he couldn't just sit and wait

$$12 \times 4 = 48$$

He called out to his mate Kitty

$$12 \times 5 = 60$$

But she was far away at the zoo

$$12 \times 6 = 72$$

Flippy jumped till his feet were sore

$$12 \times 7 = 84$$

To no avail were any of his tricks

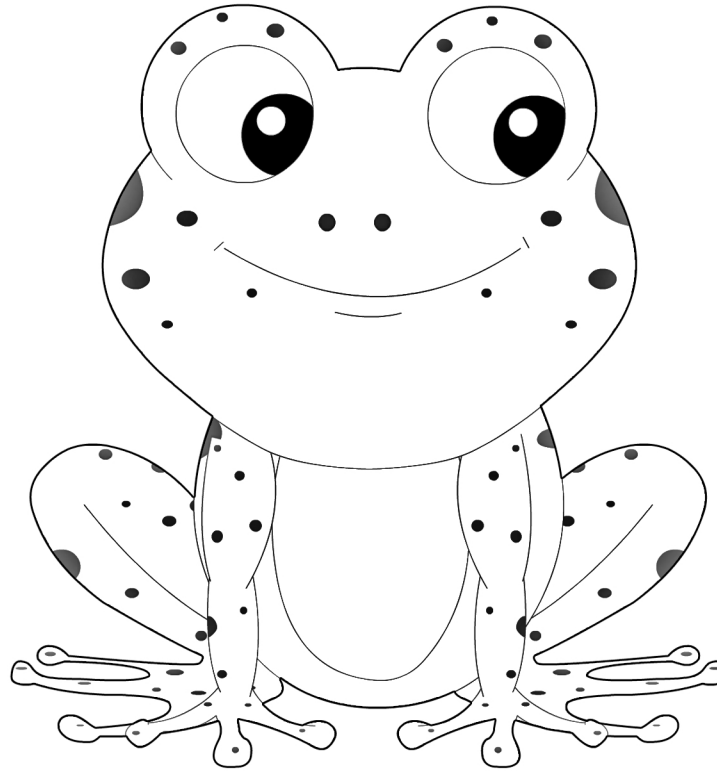

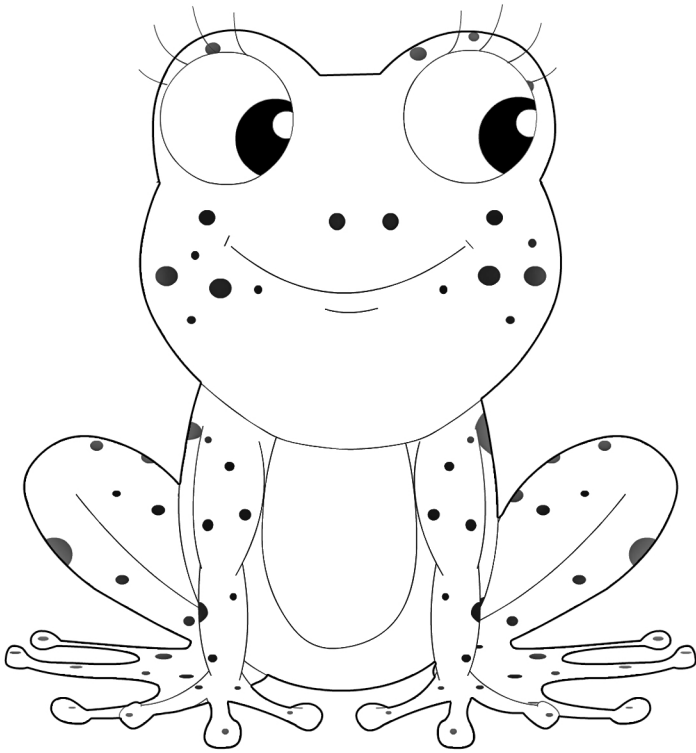

$$12 \times 8 = 96$$

Suddenly the rains changed his fate

$$12 \times 9 = 108$$

It filled up the well aplenty

$$12 \times 10 = 120$$
