

TABLE - 14

Name : _____

Table 14

There was pretty girl called Jean

$$14 \times 1 = 14$$

Her hair was blonde, silky and straight

$$14 \times 2 = 28$$

She grew it right up to her shoes

$$14 \times 3 = 42$$

She styled it with ribbons and clips

$$14 \times 4 = 56$$

But it began to weigh aplenty

$$14 \times 5 = 70$$

Combing it became a taxing chore

$$14 \times 6 = 84$$

One fine day she chopped her braid

$$14 \times 7 = 98$$

But she preserved it quite well

$$14 \times 8 = 112$$

Jean was done with the ribbons and clips

$$14 \times 9 = 126$$

She now felt so light and free

$$14 \times 10 = 140$$
